

Summary: Easily find a page in the CMS site map. This is especially useful for those websites that have many hundreds or thousands of pages.

Steps

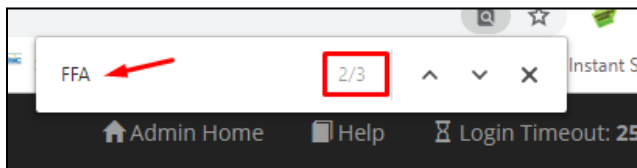

1. Log in to eSchoolView.
2. Start at **Admin Home**
3. Click on the dropdown by your name and choose **Site Map**

4. On your PC, hold the Ctrl key and the F key at the same time (**Ctrl +F**)

5. In the box that appears in the upper part of your screen, type in the name of the page

6. It will display all the pages with that name (here there are 3 total)
7. Click the up and down arrows in that box to jump from one to the next. This will highlight the page on the list. When you find it, click on it. That will jump you to the page
