

Summary: Use an image as a hyperlink to a website or an email address in a Text Window component

Steps:

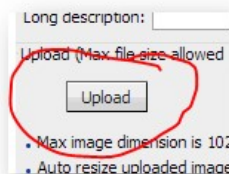

1. Add the **Text Window** component to the page where you want the link to appear and click **Edit This Component**

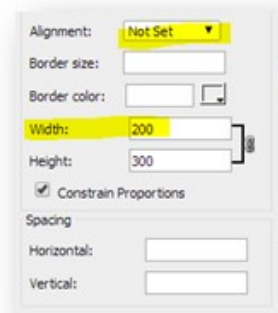

2. Click the **Insert Image** icon in the **Window Text** area

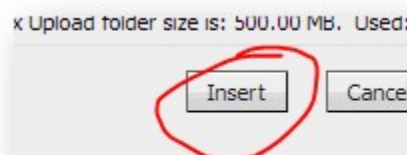

3. Click **Upload** in the Insert Image box

4. Browse for your image, highlight and Click **Open**
5. Now you can customize the image **Width, Alignment** etc

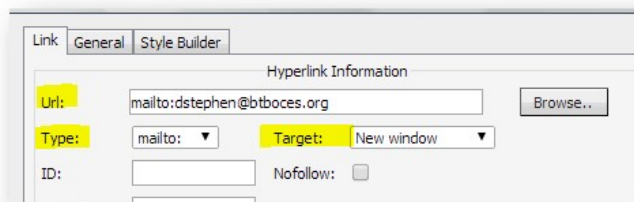

6. Click the **Insert** Button

7. Drag your mouse over the image in the Window Text area to highlight it (in blue)
8. Click the **Insert Hyperlink** icon

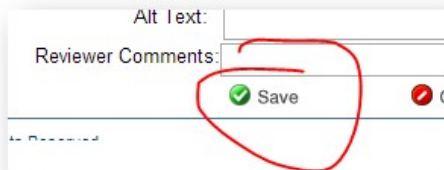

9. Copy paste the web address or type the email address in the **URL** field
10. For email in the **Type field** choose: mailto
11. **Target** field choose: New Window

12. Click **OK**

Then at the bottom of the Text Window component, Click the green **Save** button

Now you can preview your page
