

Release Date: 6/24/2021

- The student Daily Attendance Extract has been updated with the following:
 - To prevent the extraction of records containing a future date (greater than the current system date).
 - To extract single records for each present day for students with multiple enrollments.
 - To contain only 12 columns when the 'Display Header and Audit Fields' parameter is set to a NO.
 - Report logic is updated so that any code that starts with an ISS or OSS will have two records generated if they are mapped to the respective fields on the School/School Info page. This change is applicable to both Present and Absent codes.
- The Assessment Fact report updated to handle the new exemption codes for the June Regents.
 - For example, if an assessment exemption code 06304E is entered on the Assessment Fact page, then the Item Description is extracted as “Regents Common Core Algebra I Exempt – Jun”, Alpha score as “E” and the Standard achieved code as “86”.
- The SSEX Summary Data Collection report has been updated to correctly calculate the value for the *Number of Student Offenders* row, under column *2b. Other Sex Offenses*.
- The Miscellaneous page in District is updated to save the Pref to Enable Digital Equity and Learning Preference in the Public Portal correctly.
- Digital Equity and Learning Preferences page is updated to show the data while editing, even if there are special characters inside the data.
- The RecompilePSSchema.sql files for all states are updated with the compile all => FALSE constraint, in the DBMS_UTILITY function.
- The Attendance Profile report PDF library is updated and the pagination from ‘Page X of Y’ to ‘Page X’. Additionally, due to the large PDF size that can result if the report is run for a large selection of students, a validation is added to the report page to restrict the number of students to 200.
