

PowerSchool Version Update: 22.10.0.0

Release Date: 10/7/2022

New Featured and Enhancements:

- An updated Oracle 19c database installer and script updater are now available. This update brings Oracle to the January 2022 patch level. There is no urgent requirement to update, but this version offers security and bug fixes for a more stable environment.
- We have made the following enhancements to the Enrollment Summary report:
 - Gender sub-totals are back on the Enrollment Summary report.
 - A + symbol has been added to the sub-totals to capture all non-Male/non-Female genders, including students with no genders defined on the demographic page.
 - The sub-totals line is now the link to the details page.
 - The genders will display in the order defined in the Code Set on the details page.
- When accessing the public portal, the navigation icons and site map links will not show when deactivated under the Available Features for Parent/Student Access settings. In the following list, the feature deactivated is first, followed by the icon/link:
 - Final Grades - Grade History
 - Attendance - Attendance History
 - Email Notifications - Email Notification
 - Both Fee Transactions and Meal Transactions - Balance
- A new Suppress Classes for Copied Terms for Parent/Student Users option is available when performing a Copy Schedule or Schedule Commit.
- Users can now deactivate Object Reports, Form Letters, Mailing Labels, or Report Cards. The inactive reports will appear in a fixed section of the appropriate setup area.
- Users can now deactivate Object Reports, Form Letters, Mailing Labels, or Report Cards. The inactive reports will appear in a fixed section of the appropriate setup area.

Resolved Issues:

- We improved the performance of searching Students from the Attendance Dashboard.
- The attendance codes with the same sort order will display in alphabetical order.
- A student will no longer appear in the Default Present section of the Attendance Dashboard when their entry date falls after the selected date.

- A student will no longer appear in the Default Present section of the Attendance Dashboard when their entry date falls after the selected date.
- A student will no longer appear in the Default Present section of the Attendance Dashboard when their entry date falls after the selected date.
- Excess credits will now reflect as fulfilling the correct requirement.
- The search to add a course to a gradation plan will now support the characters _ and %.
- An error no longer occurs when updating the order of dates on immunizations.
- Immunizations no longer show as one day earlier in certain time zones.
- Students with the certificate type were absent are handled respectively.
- The Installer will no longer overwrite the Local Security Setting of the Log on as a service Properties when installing SIS or Oracle. Moving forward, it will append the required user list to the existing users.
- PowerSchool now bundles jQuery version 3.6.1. Unauthenticated pages, such as login pages, have been updated to use this newer version. A future version of PowerSchool SIS will update authenticated portals to utilize jQuery 3.6.1.
- Waivers can be added, edited, and deleted for historic graduation plans on the PowerScheduler page.
- A Cross-Site Scripting error no longer occurs when using the moveto tag.
- The ADA/ADM by Minute report correctly calculates the Total Attended column when using Meeting Attendance. The ADA/ADM by Minute report returns results when using Daily Attendance.
- We improved the performance of the Student Schedule Listing report.
- We have improved the performance of the Absentee Report.
- We have improved the resiliency of PowerSchool SIS after a database outage.
- The user will no longer get a security violation error when clicking the Standards tab, followed by the Quick Lookup tab.
